

GOLFING HAS NEVER FELT SO GOOD

Take your golf game to the next level!

The Golf Clinic at TRUhealthDR offers specialized care for golfers. Our 2-Day Golf Experience is designed to help you improve your golf performance through Titleist Performance Institute (TPI) certified medical care.

Using cutting-edge technology, we'll analyze your golf swing, identify areas of dysfunction or pain, and develop a treatment plan that will help you minimize chronic pains, improve your range of motion, and enhance your golf performance.

 **Identify & Reduce Chronic Pains**

 **Improve Range of Motion**

 **Enhance Golf Performance**

 **Receive Personalized Treatment Plans**

DAY 1 THE ANALYSIS

During your first session, we'll take a closer look at your health and your performance. We'll conduct a full medical screening, giving us a complete and accurate picture of your overall health.

After your screening, we'll talk about your golf performance goals, as well as the pains and symptoms that are holding you back.

Using advanced K-Vest 3D biometric technology, we'll record your golf swing on our top-tier simulator. This allows us to capture the equivalent of MRI-imaging of your golf swing!

Using both K-vest results and the data from your physical examination, we'll objectively measure the efficiency of your swing and identify opportunities for improvement.

DAY 2 THE STRATEGY

Day two is all about analysis and action. After a week, you'll return to receive a comprehensive breakdown of the findings from Day one. Our team will present you with a Body-Swing Connection analysis, showing you how your physical health is affecting your golf swing.

After we've identified your dysfunctional or painful patterns, we'll give you a 3-4 stage treatment plan that's designed to reduce pain, improve mobility, and enhance your performance on the course. This treatment plan could include chiropractic care, physical therapy, neuromuscular re-education, motor-pathway rehabilitation, massage therapy, and even TPI-certified golf speed and power training.

DON'T LET CHRONIC PAINS HOLD YOU BACK.

Join us at The Golf Clinic for a golf swing analysis, and start playing your best game!
